RoHS Declaration

We have read and understood the requirements stipulated in the RoHS Recast Directive, 2015/863/EU, published in the *Official Journal of the European Union* on July 4 2015, on the restriction of the use of certain hazardous substances in electrical and electronic equipment.

The Restricted Substances referred to in the RoHS Recast Directive, 2015/863/EU, and maximum concentration values tolerated by weight in homogenous materials are:

Lead (0.1%)

Mercury (0.1%)

Cadmium (0.1%)

Hexavalent Chromium (0.1%)

Polybrominated Biphenyls (PBB) (0.1%)

Polybrominated Diphenyl Ethers (PBDE) (0.1%)

Bis(2-Ethylhexyl) phthalate (DEHP) (0.1%)

Benzyl butyl phthalate (BBP) (0.1%)

Dibutyl phthalate (DBP) (0.1%)

Diisobutyl phthalate (DIBP) (0.1%)

The directive defines the term “homogenous material” as one material of uniform composition throughout or a material, consisting of a combination of materials, that cannot be disjointed or separated into different materials by mechanical actions such as unscrewing, cutting, crushing, grinding and abrasive processes.

All components, materials and substances supplied to Flexform Cable Engineering comply with the requirements of the RoHS Recast Directive, 2015/863/EU. The substances listed are not deliberately introduced in raw materials or processes and their eventual presence meets the requirement of the above directive.

Compliance has been determined by the following method:

- Evaluation of technical data provided by our raw materials suppliers.

Signed:

A handwritten signature in black ink that reads "Jennifer Franklyn". The signature is written in a cursive, flowing style.

Jennifer Franklyn
